## FEATURED PROJECTS

### LINCOLN HIGH SCHOOL MODERNIZATION

Performed abatement and demolition of 250,000 sq ft historical Lincoln High School in Seattle, Wa.

### GLACIER SITE NEW MIDDLE SCHOOL

Abatement and demolition of a large high school including thousands of lineal feet of PCB contaminated caulking. Project also included subcontracting surveying, earthwork, utilities, and site stabilization.

### HARRISON MEDICAL CENTER

Complete Hazardous Materials Abatement, and Demolition of the former Harrison Medical Center, located in Bremerton WA. The structure was comprised of multiple buildings and additions all built with differing construction methods. Non-recyclables were removed from the structure prior to complete demolition maximizing recyclability and making the demolition more efficient.

### BELLEVUE CITY HALL PARKING GARAGE

Selective demolition of approximately half the existing post tensioned parking garage. Included all pre-work for routing of new traffic, installation of soil shoring, and engineering and shoring to safely de-tension the post tension cables.

### MAIN ST. 405 BRIDGE

Complete demolition of Main Street Bridge over I405 in busy downtown Bellevue corridor. Crews worked around the clock to demolish and waste haul over 5,000 tons of material in just one weekend!
