# 112th & Main

## Project:

Total demolition and abatement of Azteca, **7-story Sheraton hotel**, and accompanying buildings right off i405 in Bellevue, WA. The hotel was constructed of a mix of pre-cast and cast in place concrete elements and required a highly orchestrated and specific demolition method to be brought to the ground safely. The Azteca restaurant required significant exterior abatement of its entire Stucco finishing system. This was accomplished in a full exterior enclosure under negative pressure. After demolition was completed, nearly **5,000 tons** of concrete was processed and left on site to stabilize basement walls and foundations which were remaining in place.
