

Tacoma News Tribune

Project:

The total demolition of the **240,000ft²** former Tacoma News Tribune building. Prior to full demolition, the interiors of the building were selectively demolished to remove unrecyclable items from the building. Structural demolition was mainly done with the help of 3 high-reach excavators and led to nearly **8,000 tons** of generated concrete were recycled. Project size nearly **\$1 million** and **5 Ascendent owned excavators** on site.
